Summary

Passionate Full-Stack Developer with hands-on experience in MERN stack and Machine Learning. Built multiple web applications and AI-driven solutions. Eager to apply technical skills in building scalable products that solve real-world problems. Looking for opportunities to grow as a developer in a product-driven environment.

Education

2023 – 2027	B.Tech, Vignan's Institute of Information Technology	CGPA: 8.36
2021 – 2023	Intermediate (M.P.C), Amaravathi Junior College	91%
2020 – 2021	SSC, Akshara The School	72%

Technical Skills

Languages:	JavaScript, Python
Frontend:	HTML5, CSS3, React.js
Backend:	Node.js, Express.js
Database:	MongoDB
ML & AI:	Scikit-learn, Pandas, NumPy, XGBoost
Tools:	Git, Postman, Netlify, Render, Vercel, Streamlit

Experience

Machine Learning Intern – Codtech IT Solutions Pvt. Ltd. May – Jul 2026

Remote/Visakhapatnam

- Built ML models for air quality prediction, breast cancer diagnosis, and customer segmentation
- Implemented XGBoost for credit risk assessment and K-means clustering with 90%+ accuracy

Web Development Intern – ApexPlanet Software Pvt. Ltd. Jun – Jul 2025

Remote/Visakhapatnam

- Designed and developed responsive web pages with modern UI/UX using HTML5, CSS3, and JavaScript
- Built RESTful APIs and integrated backend services using Node.js, Express.js, and MongoDB
- Optimized website performance and implemented cross-browser compatibility

Projects

EcoTrack AI Portal – Carbon Footprint Tracker May 2026

Python, Streamlit, Plotly, Google Gemini API

- Built a solo capstone project for Lenovo's LEAP AI program addressing UN SDG 13 – climate action
- Integrated Google Gemini API as an AI Sustainability Coach providing personalized reduction goals
- Created interactive visualizations with Plotly and generated downloadable PDF/Excel audit reports

AI-Powered Symptom Analysis Platform Jan 2026

React.js, Node.js, Express.js, MongoDB

- Developed a full-stack healthcare application for symptom analysis and medicine/diet recommendations
- Implemented an intelligent chatbot to guide users through the symptom-checking process
- Integrated Google reCAPTCHA for secure authentication and stored medical history with MongoDB

Blood Donor Management Platform Mar 2025

React.js, Node.js, Express.js, MongoDB

- Built a MERN-based platform connecting blood donors with recipients in real-time
- Implemented JWT authentication, profile management, and complete CRUD operations for donors
- Developed an admin dashboard to monitor donor requests and manage platform data

Certifications

- AI Program (60+ hrs) – Lenovo LEAP NextGen Scholar (Lenovo & BharatCares)
- Frontend for Java Full Stack – Coursera
- Large Language Models (LLM's) – NPTEL
- Web Development (HTML, CSS, JS) – Cisco Networking Academy
